

## The Best Total Wound Care & Infection Control

### First Aid

Shelf Life ~ 4 years

## Severe Burns

**Patient:** 11.5 month old Yorkie 4.7 lbs.

The owner left this dog in a portable carrier with a hair dryer hooked up to the front of it to dry it off after a home bath and they forgot about it.

Presented with severe burn through full thickness of the skin over the ventral chest wall and medial forelegs.

### Derma Gel® Spray Treatment

After 3 weeks, wound is completely healed – Scar tissue is softer and more elastic resulting in less stricture and contraction of surrounding skin

### Key Points:

- Fast healing (60% faster than any other product)
- No proud flesh or hair discoloration on regrowth
- Protective film effect + insect repellent
- No infection
- No suturing
- No bandaging
- No loss of mobility (no tissue adherence)
- Best value for money (fast healing = less applications)
